

GIS 2 (Geographic Information Systems 2)

Position is a full-time, non-exempt opportunity located in Walkerton, Indiana.

Come join an Award Winning Team! JFNew was the proud winner of the 2007 Samaritan Award for family/friendly workplaces in Indiana!

Provide GIS technical support developing, presenting, and maintaining geographic data. Assist project and senior managers with data analysis.

Looking for a GIS professional to provide GIS data resource support to 25 peers, provide technical support to internal GIS users and non-GIS staff, provide support for company-wide marketing and project tracking, and drive GIS service business development and services. Individual should be able to complete tasks including, but not limited to, digitizing, geocoding, spatial analysis, creation of data tables/databases, map—making, reprojecting data, dataset research, and data acquisition.

Responsibilities:

- GIS application design and development;
- Spatial data layer creation and conversion;
- Geo-database development, management and administration;
- Data entry and analysis;
- Database creation and maintenance;
- Develop methods for depicting and analyzing geographic information;
- Creation and maintenance of standard and customized digital maps as requested and required;
- Provide technical support for other GIS users and non-technical staff; and
- Specific GIS project management.

Additionally, this individual should be able to do the following:

- GPS data collection and management;
- Write, format, and edit maps, data, and reports;
- Modify and create GIS drawings as needed;
- Manage multiple tasks or projects simultaneously;
- Possess strong communication skills for correspondence with internal and external clients

Requirements:

- A minimum of three years professional experience with GIS;
- Strong knowledge of GIS and GPS concepts and software applications, specifically ESRI GIS platforms for ArcGIS and ArcPad;
- Bachelor's degree in geography, computer science, earth science or related discipline
- Working knowledge of Microsoft Word, Excel, Access, Power Point, Publisher, and Outlook; Adobe Photo Shop; AutoCAD; statistical software; and other IBM-compatible software;
- Ability to use a compass and read maps; and

- Ability to take thorough and legible notes in the field and office.
